Not sure why but maybe someone else noticed the same problem.

Here you can see the last reply on that thread and when I got to free services and giveaways the thread is not there and I am not able to find it.

Here you can see the last reply on my thread is by happygonutty and when I got to threat there is no reply.

This is because it's within the Market tab, which requires [Stanley](#) to bump the thread for it to be visible at the top. The thread will show if you click on "New Posts".

The thread mystery is solved and the missing post (two) just reappeared. Something new (for me) was learned. Thanks.
