Thread: [Phone number location](#)

Jasnaalien - May 16, 2024, 1:47 pm

Hi I wonder what are some methods to find out location of a phone number. Thanks

How specific of a location are you trying to find?

Go Google a picture of the sarcophagus, which sits on top of the chernobyl nuclear reactor, and text it to them. It has to be the one with the tower and the building.

I'm not even kidding do it it will solve all your problems. Or make them worse for both of you but gotta do what you gotta do.
