Welcome to my Fallen 666 Upgrade Giveaway!

In Fallen we are all about boosting site activity, and being upgraded is the best way to experience HackForums. Here's how it works, any regular members who make 66 quality posts in 6 different sections, I will send you 2500 bytes so that you can purchase a 60 day upgrade.

Rules:

1. The posts must be quality. Don't spam, I will be checking your posts. If I see too many that seem like you're just farming your count up, I'll disqualify you.
2. You must make 66 posts TOTAL in 6 different sections. So however you want to get those 66 posts, they must be in at least 6 different sections of the forum. If you want to do 10 in Anime, 10 in Science, 10 in Software Development, 10 in Beginner Hacking, 10 in Social Media Hacks, and 16 in Computer Hardware, go for it, or you could make most of them in 1 section and pick another 5 sections to make some posts.
3. Your posting starts today. Any posts before this thread are irrelevant.

I'll be hosting this until June 16th.
