Hello,

Take a look at [tryhackme.com](#), [privesc](#) on Linux and Windows courses / exercises

Hello. I am licensed cybersecurity professional. Personally, I do not think privilege escalation is a beginner TTP and reserved for more advanced pivoting methodologies but if you think you are up to it check out The Hacker Playbook 3: Practical Guide to Penetration Testing by Peter Kim.

Actually, just do this. There's hundreds of labs online from vendor after vendor. Cengage Mindtap offers really good ethical hacking labs that cover priv escalation on both linux and windows.
