Thread: [All In One Verdugo Checker | Automatic Captcha Solver | Private Checker](#)

Arkane21 - May 21, 2024, 2:57 pm

Verdugo Checker

A unique self-written checker that solves captcha as it arrives.
The checker works both on requests (HTTP) and on the webdriver.

Functional: Internal proxy checker

Cleaning Repetitive Items

Inserting a proxy via URL

Multithreading

Collecting information about accounts (games, subscriptions, etc.)

Automatic Captcha solution

Token verification

Queue to Captcha on the server side

Nice and simple design

Plans for upcoming updates to add: Linking a Telegram account with a checker (so that you can interact with the checker remotely through a Telegram Bot)

Separate proxy checker from the main checker

Adding new services

In the long term, it is planned to refactor the application and rework the core functionality so that you can add personal private services for each user separately

List of available services at the moment (version 1.0.0):

Disney

Express VPN

Instagram

Netflix

Pornhub

Spotify

Steam

Uplay

Mac: Yandex Disk: (expected in the next patch)

Mega: (expected in the next patch)
VirusTotal: (expected in the next patch)

Linux:Yandex Disk: (expected in the next patch)
Mega: (expected in the next patch)
VirusTotal: (expected in the next patch)

Installation guide (important):

Windows:

You need to download the installer via [Yandex Disk](#) or [Mega](#).

When installing, you MUST agree to install Python 3.12 in the installer (the installer will not install Python if Python 3.11/3.12 was detected on the system). In the Python installer, you MUST add Python to PATH (otherwise the application will not work).

If you encounter problems with the installer (failed to install the application or modules), please contact [Telegram Bot](#), Jabber (verdugo@xmpp.earth) or forum DM

Getting started:

When you first log into the application, you will see 2 fields:

Field for entering a license key: here you must insert the purchased license key.

Field with a unique identifier of your device: this field serves to identify you as a user when purchasing a license and subsequent use of the checker.

You need to copy the unique identifier of your device (field 2) and contact the [Telegram Bot](#), Jabber (verdugo@xmpp.earth) or forum DM.

You pay the amount for the licensing period you want.

After payment, you must enter/insert the license key into the license key entry field (field 1).

Done!

Checker cost: 80\$ per month

Contacts for purchase and support:

Telegram Bot: https://t.me/verdugo_payment_bot

Jabber: verdugo@xmpp.earth

You can also write in private messages (DM) of the forum.

If you doubt the functionality of the checker, you can request a trial period from the administrators (valid for up to 20 minutes). You can also send a request in [Telegram Bot](#), Jabber (verdugo@xmpp.earth) or forum DM.

Examples:

Video: <https://disk.yandex.ru/i/5zxwQ9zXKLiRGA>

Example output of "validDetails.txt" file:

ATTENTION!

The license is issued for one device ONLY.
Changing the license device is subject to a fee.
The cost of changing a device is \$5 for each change.

Terms of use: This program is intended solely for checking your own accounts.

The seller is not responsible for any actions performed by users using this program. Users are required to use the program in accordance with applicable law.
