Hi,

Any of you guys here have any feedback on Spynote Pro? Is it worth the \$999 price? Any connection problem? Is the APK being flagged by Android?

Thanks in advance

Spynote has been crack many time.
spydroid is fucking awful
craxs is very bad.

you should look with chinese or russian forum for this. banking trojan for your use is much different than rat.

Spyroid is literally just a reskin of craxsRAT for sale here on the forum by a very bad seller who is famous for reskinning open source tools.
Do not bother.
