Thread: [How to do a proper contract tag, with my ID and so on?](#)

Loxy - May 26, 2024, 2:52 am

I am quite confused, I tried putting in on my ID and so on.

I want two contracts to my thread, one for the other option, one for the other, and both will have the text on it different.

How can I make a contract like this, or if somebody could make me one or help me out how to do it and add it to my thread I can +rep you and thanks a lot!

My bad if this is wrong spot to post on.

Like some people have contracts, once you click on them it says the service, it says the user, the text, so i want it like that on my thread.

<https://hackforums.net/allhelp.php> - Scroll to the bottom for the Contract MyCodes.

Is this what you're referring to, or are you referring to the custom Contracts Vendors can use?

Not sure what vendors can do, but I just want the contract button to be, so when customer clicks, it shows my thread link what he is purchasing and (from me?) I guess. I will check it out thanks.

I guess. I will check it out thanks. Have the post be something like this so that it links to the thread:

```
Code [contract=tid]Start Contract[/contract]
```
