Thread: [100% inbox email bomber 3-5k / email](#)

Divinity - May 26, 2024, 3:54 am

Topic.

No bullshit, that mail bomber has to be able to handle gmails well, any other email.

It has to flood all 1-2k + within one hour.

Do not message me if you / your tool cannot do it.

Need to handle 3-5k sendouts to around 50 emails a day.

Hit me up with your telegram via DM.

This task of them getting through especially gmail and others so its not going to spam is little hard, when I get more time in my hands developing other things right now, I will contact you if you still need this.

Or how soon you'd need something like this and PM me what pricing would you be able to pay.

Need this asap and preferably self-controlable. Because I do not want to be dependent on someone always to start the spams.

Thank you regardless bro

AWS SES, 160k daily sending limit, 80 messages per second available!

Farjana - May 30, 2024, 4:30 pm

Update ones you get. I need it as well

Mooooookie - May 30, 2024, 8:36 pm

Looking for the same thing.. I'm actually really surprised that not one person on this forum has the knowledge on how to do this. I was expecting there to be multiple people, with different offers.

These can't be used for the task that we're trying to get done though, right? These accounts are used for mass mailing to lists of emails, not multiple emails to the same target, or do you know something I don't know? I'm all ears.

you are right.

Still looking smh.

xDrHax - June 1, 2024, 4:16 am

PM me more details about your reqs and we will discuss
