Thread: [Bypass Wordpress File Upload](#)

chisatomisaki - May 28, 2024, 8:54 am

Hi everyone, I'm a newbie here. Recently I've access to a website wordpress admin and I want to upload a backdoor shell to it so I can comeback later if the password chagne. But i don't have any permission to access to plugins/files editor because it's disable in wp-config. So that I want bypass wp media upload to up shell to it and I've tried many way but nothing work-out. Does someone know how to get through it?

A quick google search for your issue produces this "github.com/22XploiterCrew-Team/Wpushell"

This is one example, but I am sure there are others.

If you have access to the WordPress administration, I would look for privilege escalation opportunities, however, that depends on what your objective is :)
