Thread: [Flash usdt trc20 , erc20 and at binance also](#)

eren040 - May 29, 2024, 7:14 pm

Dear people, I keep hearing more and more about the existence of a flash coins method for USDT (TRC20, ERC20) on all wallets and platforms.

You can do everything with it, but the only downside is that they disappear from your Wallet or platform after 45 or 90 days. In short, it is fake.

So my other question is, does THIS REALLY exist? I've read about it everywhere, and how is something like this made? With a software application, or is it really coded work? Or is this all nonsense?

I am interesting about this thread and flash coin .

well my friend, are we really upto a bitter truth or just wanna listen our favorable version of the story that is all it gets, i have researched about it there are real flash coins & they are for sure real stays in your wallet for about 22 days, extended periods depends upon the block structure but 99% of claiming sellers are b.s scammers, as far as they can be taken on Binc is concern no you cant if detected your account may be locked. but you may use them in casino like games and if luck may favor you may get returns. but again i warn you 99% of acclaimed sellers re scammers.

There's nothing like flash Bitcoin, flash USDT.... Only clone Bitcoin token, clone USDT token and clone stable coins tokens which doesn't disappear from wallet when sent. These clone stable coins tokens are worthless and has \$0 value. Feel free to correct me if I'm wrong?

ferferferf - June 3, 2024, 1:58 am

It's impossible, it doesn't exist. Obviously, 99% of the people who claim to have it are scammers because no one actually has it. Otherwise, a huge number of articles would have appeared long ago to warn about this scam. I don't know what world you're living in, but you need to come back to reality, guys.

Not actually optimus, understand the fact of human existence if something can come to mind then it is possible, impossible never comes to mind its mathematical equation, flash coin exist they are for real but there access is very limited to those in the know, any senior may conform it too, if you know blockchain & cryptography you will understand it instantly.

Worst attempt to set up for a scam that I've ever seen

Melalis - June 13, 2024, 9:16 am

Yes it's real i saw a lot of information about it

do you have it?

danielgomesb - July 17, 2024, 6:53 pm

This is just a scam, mostly used on YouTube videos to make you download a crypto clipper or banking Trojan

littlesunshinexox - September 2, 2024, 9:02 am

I researched it for a very long time.

Then I found a seller on a darknet market - tried it AND it worked.

The Flashed BTC could be swapped, send to different Wallets and get splitted and such.

After that I only worked with him and later found a seller of USDT Flashing Tool.

It's working.

I am not saying there aren't any scammer - lost over 5k on it but never gave up until I found it.
Don't give up

Yeah that's true but it's hard to find a real seller I lost mine a few weeks ago do you some contacts to send me on it?

BornPoorDieRitch - November 17, 2025, 12:17 pm

I DONT BELIVE SOME ONE HAVE A TRICK OR PROGRAM / EXPLOIT TO MAKE FLASH COINS. BUT I KNOW ONE THING AFTER FEW DAYS ALSO 10K DELTED FROM MY SAFE WALLET. THATS WHY I AM SEARCHING FOR IT ALSO.
