Thread: [Do you count on your fingers?](#)

**LMPara** - May 31, 2024, 9:48 am

When doing math, do you use your fingers to count, divide, multiply, add, and subtract? Or are you the type of person to do it all mentally? I use my fingers sometimes when I need to do quick math, but its very rare haha. Its mostly if I'm listing off things that I'll use my fingers. What about you?

**Absence** - May 31, 2024, 9:50 am

I don't think I use them for counting at all, maybe some type of problem solving or something.

Yep, all of the time. Use the tools you've got.

**Deany** - May 31, 2024, 9:57 am

Sometimes yes when the brainfog kicks in

I usually do it in my brain, but sometimes use papers or even calculator, but usually i do it on my brain

**Renowned** - May 31, 2024, 11:13 am

Nah, for me maths hasn't really ever been that difficult mentally. Visualise the numbers and do your sum like on paper but in your imagination. E Z P Z.

I do the math in my head, but I do remember counting on my fingers back in the day.. it's a tried and tested technique that always works! You might look funny doing it, but as long as you get to your answer, then that's all that should matter.

**Chung** - May 31, 2024, 5:05 pm

Only when it's a simple calculation to make sure I'm 200% correct.

I do hand movements most of the time especially when explaining so most likely I use my fingers when doing math. ?

If the math is easy and simple like countin money I Do it mentally and I can multiple and divide large numbers mentally.

**gwiz** - June 1, 2024, 6:13 am

No, never. All in my head.

**Luigi** - June 1, 2024, 4:21 pm

Yes, I still count with my fingers.

**Deany** - June 1, 2024, 5:51 pm

Where are the freaks who count on their toes ?

**630** - June 2, 2024, 10:01 am

I am a mental math individual.

**ThaBeast45** - June 2, 2024, 5:31 pm

For divide I do there's a little method I use. Google it :D useful AF
