Thread: [InVID Image Reverse Search and Analysis Tool](#)

SilentNuke - June 4, 2024, 12:10 am

Hey folks. (im sorry if this is the wrong section, i didnt know where to post this)

I have just come across this tool called Fake News Debunker by InVID and WeVerify which is a great tool for reverse image searching.

It is a Google Chrome extention and can be downloaded here:

<https://chromewebstore.google.com/detail/fake-news-debunker-by-inv/mhccpoafgdgbhjfkhkcmgknndkeenfhe?hl=en&pli=1>

It allows you to right click an image and without having to download the image and upload to other reverse image searchers, select from a variety of image hosts right from the menu:

Magnifier: (you can zoom in but i dont know how - scroll wheel just scrolls the page up and down)

Its a very handy tool to have in your arsenal - just thought i would sharer it with you.

No problem, it seems pretty solid so far. Have you managed to get the zoom feature in Magnifier to work? I cant get it to zoom.
