Thread: [Spoofers for sale | +2000 users | 1 year running | GOOD BENEFITS](#)

opsec667 - June 6, 2024, 6:27 pm

Hi all, having decided to stop providing a spoofing service I've decided to sell my project completely, which is a Spoofing Call site with various tools such as DTMF.

Included in the sale :

- WEB server
- VOIP server
- Customer database +2000 users including 150 subscribers at 150€ per month
- Complete panel with administration
- Telegram channel with 1500 subscribers
- Crypto and CB SIP providers
- Sender ID SMS Spoofing providers
- Script DTMF Interceptor

Knowing that we've been open for a year, with stability at 150, 200 subscriptions per month costing 150€, not counting the price per minute which is 0.25 on the site and which is 0.05 or better with other providers, so full profit.

A lot of support for such a service, be reactive, have several suppliers in case of failure, and have a good customer relationship. I don't necessarily need technical knowledge, I can help and advise as well.

Price : 10,000\$

MM IS OK

So you are selling a project which is bringing in \$22500 a month(currently) for \$10,000?

Just wondering, good luck

The service hasn't worked for 1 week.

much0day - June 7, 2024, 2:40 pm

why not sell it when it up and running?

HackRef12205 - June 7, 2024, 6:12 pm

Bringing in crazy money for such a cheap price? Seems maybe too good to be true? What would be needed to fix the issues?

webdev77 - June 7, 2024, 6:39 pm

You probably want to fix it before selling. The current revenue is meaningless if it's not actually working since that's going to be 150 angry customers unless things start working again shortly.

guzman1337

@SCARETH1337

a complete swindler.

Scammer refusing to request a middleman deal!

Scammer asking for a small amount with the conditions for testing!

Scammer asking for \$150 for consultation & 1 hour system test!

Scammer who goes into hiding immediately after getting deposited money for the purpose of testing!

Never make a deal.

There is no solution advertising that this poor scammer is offering.

Only, it's a false advertisement to steal a small amount of money.

If you ask for the evidence of the scam, I will send it all.

I have all the data for scams.

I will send the data to the person who requests it.
