Thread: [Make Money with Telegram Channel](#)

WE\$T\$IDE - June 7, 2024, 2:39 pm

Hey guys, I run a TG Channel. I post free leaks etc there every day. My question is this. Is there a way to quickly build up the channel with real followers? Currently I only have 270 members. Is there still a way to monetize the whole thing other than with ADS links? Does it even make sense to switch ADS links at the beginning?

Does anyone have any tips for me? e.g. How can I buy advertising or spammers spamming Reddit with my channel link?

Thanks

I donate B\$ytes for good tips

Spam isn't likely going to get you the results you want. The majority of people can identify spam for what it is and it will reduce your ability to monetize anything if people perceive it as sketchy and low quality. Posting targeted and relevant content will yield significantly higher conversion rates for any monetization techniques.

For your specific topic, you'll want to be advertising to the shady places where people go to find your type of content. Figure out what communities exist related to your topic, join them, get a feel for how they work, and start to build trust among them. Only once you have an established presence can you really begin to effectively advertise channels.

Straight up joining a forum and immediately trying to take people off the site to somewhere else goes against the entire point of forums, so don't do that. Build a reputation and a reason why people would want to join your platform. Show people why what you have is worth their time to join an exclusive group.

If you just want to buy social media stuff, someone in the marketplace here could probably help you. I don't have any specific recommendations as I don't personally use this sort of service.

Thank you for your answer. I offer free material in the channel (Free OF Leaks, Free E-Whoring Packs, Guides, etc.)

How do other channels manage to get 50,000-150,000 members? They have to be "seen" somewhere.

I've built for this Scraping tools to scrape members from competitors and then add them into another one group. This is a simple and effective way to increase telegram engagement.

This is also used for Memecoins Shilling.
