Thread: [Blocking signals radio,WiFi,Bluetooth](#)

H-GaMe - June 8, 2024, 4:40 pm

I want some help in blocking signals inside house

Thx in advance

Rogers Communications - June 8, 2024, 4:55 pm

cant block everything.. you need to focus on 1 or 2 things only

DramaKing - June 9, 2024, 3:36 pm

You want to jam WiFi in your house? Signal jammers have a range of a couple miles and are illegal. Plus, if you want to jam all frequencies from 530 kHz to 6 GHz, that's a joke. What reason could you possibly have for wanting to do this?

RishiSunak - June 17, 2024, 6:15 am

It would be much less hassle to monitor for signals that you are concerned of and devices themselves that show up around your proximity.

I'd individually monitor bluetooth, wifi, and radio signals if I were going to try this you can also explore things like wall of flippers.

As others mentioned signal jamming is in most places illegal and likely to draw more attention than it would mitigate.

Need documented proof of you wrapped in tin foil with multiple gauges to read the environment on the inside and outside of said tin foil suite... for science..

Unfortunately, they are illegal to use. However, not illegal to purchase. It's a very grey area in the law.

But, I must agree with DramaKing, what would be the reason to block all signals? it's impossible to only target one house, you are talking at least a whole street or neighbourhood would be offline in every frequency.

I'd recommend you stay away from jammers and potentially just manually monitor threats. As I can only assume this is for a not so legal intention.

Good luck,
Climax ?

mdk4 interface f -s a -m stb --frag 2,4,100 -c some channel
stops most traffic in short order
