what is Airdrop farming?

Hey, it's an easy way to make some extra money with minimal efforts, crypto projects will pay for you to use their projects, in simple ways imagine you create a bank and in the start you want people to start using it because you have good conditions. So you pay other people to start spreading the word basically.

Airdrops are the way of big crypto projects paying the people that used it.

Seems complicated but it's very easy!

Why it sound like a ponzi scheme? Because I'm helping people? Search the internet for crypto airdrops and understand it before commenting something like that.

danielgomesb - July 17, 2024, 6:52 pm

Not going to PM you, you could just make a thread actually teaching people how to do this

timtebow - July 21, 2024, 8:48 am

Can vouch that obsidiand really does what he says he will do. I learned how to use layer3.xyz through his guidance.

Whether that generates any profit remains to be seen. Only been doing it for a few wees. But he is a good tutor and doesn't ask for \$ or anything like that.

My friend I can't teach on a thread because there are multiple stuff, you can join my discord to see by yourself, I charge nothing
