Thread: [i wanna learn discord stealer](#)

cocid7972 - June 12, 2024, 8:23 am

Hey...wassup i wanna learn how to hack insta

I cry blood - June 12, 2024, 8:38 am

If you're interested in stealers that transport the stolen information to a Discord server, you can check out the [Creal Stealer](#) on Github.

Binance - June 12, 2024, 10:07 am

Phishing is the only way really.

Whether you phish credentials or phish to drop malware, you require competence in the art of social engineering

Even though Python is heavy if it were to be converted to exe, its still somewhat effective. ?

In the link I posted, the setup tutorial for Creal makes use of AutoPyToExe which packages the .py script and all of the dependencies with it as an Windows Executable.

But yes, there are better languages to use, especially compiled ones over interpreted.

True I am just impressed that internet is fast nowadays and this is now applicable. I still remember more than a decade ago in this forum (I think that was 2009ish), somebody posted a tutorial on how to do python to exe method which encapsulates python dependencies and make it run as an executable. It's kinda heavy back in the day but now it can be applied in real world scenarios and I am just impressed. ?
