I'm unsure how to exchnage this. I sold an OG telegram on fragment and now don't know how to exchange this safely to a normal crypto. Any ideas or help with this would be great! Thank you

You can convert your TON coin to any cryptocurrency of your choice on the Binance platform.

You should find a trusted friend to do that for you it easy you get it done 1:1 and only charge for withdrawal fee. Good luck

If you want LTC I can help move some of this. Would start small to test it out ~\$100, and probably add 5% for my time and fees.
