You cant do that in modern day
you were able to in 2010-2012.

If you could we would all be rich

most videos you see are scams. Anyone with this Oday exploit would sell it for multiple millions.

Dont be a dumbass.

You certainly can make a RAT open a PDF. Best way is some code that downloads a PDF and opens it. Seems kind of backwards, though.

Seriously? It depends on the RAT. It should have a way to download a file to the infected machine and then you open it with VNC or a command. Don't know why you would want this.
