Thread: [What are bountys](#)

Kellogsbrandedcereal - June 15, 2024, 4:02 pm

I'm new to this site and have no idea what bounty's are, can anyone explain?

Quote:What is a Bug Bounty?:

A bug bounty is a reward offered by organizations/companies to individuals/teams who identify and report security vulnerabilities in their software or systems, which helps companies/organizations with keeping their security update to date. It's a proactive approach to discovering and fixing flaws before malicious actors can exploit them.

Here's the answer to your question.
