Thread: [When do hackuman eggs expire?](#)

SpyNet - June 17, 2024, 6:15 am

I got 3 so far , i think ?

When do they expire, i will play the game and u you guys suggest to play the game?

Can you win at least some amount of bytes from it? Sor if wrong post forum.

Jamika - June 17, 2024, 6:19 am

After certain time they all get deleted

And i dont suggest u to hatch it because the hum will get killed soo soon

U earn cash from it? No u dont, only game relted to cash is flip and slots

I believe it's 7 days after you receive them. [DemonAsylum](#) could tell you exactly how long.

You could always crew up in Hackuman. <https://hackforums.net/showthread.php?tid=6048790>

It's not up to date though, it gives a good understanding of the game. It doesn't include the newest hackuman eggs released (purple and ev1le). There might be some missing details, like the hatch costs have changed.

More to your questions, no you can't win any bytes from it and on the contrary it costs you bytes to play in various ways such as incubating your eggs, feeding them, buying items, and feeding your HUM (creatures from the eggs). As for if you should play, completely up to you. Some will say yes, some will say no. Maybe look into the game more and if it sounds like something you're interested in and you don't mind putting your bytes towards it as well as at the risk of them going to waste since your HUM can be killed by other players, than give it a go.

Idk man, I feel like sometimes they last a little longer than a week. I could have sworn I've seen like 8 days on an egg

The reset time for them is 11:08 AM EST. If you get one after that on any given day than it will last into an 8th day technically until that reset time, yes.

So if you got one at 12:00 PM EST today, the 18th, it would expire at 11:08 AM EST on the 26th rather than the 25th and in turn making it technically more than 7 days. It's just easier to say what it essentially is, a week.

Ah okay, I definitely understand it better now. I thought it just reset exactly 1 week after acquired. But I guess it uses less resources to just do a daily reset at 11:08AM EST.

To be fair, a lot of people probably think that and understandably so. Yeah though, it's how I explained and now you know ??

You can play the Hackuman game with them. You battle other Hackuman and [DemonAsylum](#) will destroy you :)

(Jun 18, 2024 03:10 AM)Portugals Wrote: [\[CITE\]](#) What exactly are the benefits of these eggs? Basically just provides you an opportunity to play Hackuman which is a game on here kind of like pokemon. It costs bytes to hatch the eggs as well as feed your HUM, buy items, etc. Then in the game you attack HUM of other members or of course can get killed by theirs.

As a matter of fact I vouch this and this is what I currently am doing right now. Regardless of getting rare hackuman eggs according to some users, I don't indulge myself in the temptation to hatch one because a month ago or two I think, I tried to spend all my saved up bytes ending in up to get wasted after getting everything killed in a few hours. Lol.

I think if you were to play hackuman, its best you have lots of bytes in order to strength it all up. Right now, I only suggest what Jamika suggests.

Zalbai - July 3, 2024, 7:10 am

In fact, I find it unnecessary and nonsense that they are deleted.

At Easter, grandmothers always said that if the hard boiled egg stays for more than 7 days, it will spoil. But I don't understand what the developer was thinking here...

It should actually be like this: If you have received the maximum number of eggs, you shouldn't get

any more eggs until the space becomes free.
