I need some people to play games with me. If you play any of the following games, please reply.

- Growtopia
- Ark Survival Ascended
- Minecraft Hypixel
- OSRS (Free worlds, sorry)

Not looking for trolls, just want to pass some time having fun.

You should install PUBG I'd play that with you.

In practice range? yes but not in comp matches and unrated, valorant ranking system is very strict.

I just did a quick search, and apparently 2 months ago its been documented valorant comp has cheaters. I'd say where I found it but don't want to post other forums. Almost every game will have cheaters, the game mode means almost nothing.

Almost every game will have a cheater, / cheats, just takes the right mind, usually someone in Russia or hard to get to. Cheats/hacks can make millions a year, like HyperFlick, offer a free trial on Wednesday boom.

There's no way in HELL, you just told me it doesn't have cheaters.

Yeah well it's a global record, vanguard is strict too, it's literally a rootkit and the most hardest AC to bypass(I still cheat in Valo).

Nah dude not almost game, it's like in low elo and most of them are closet cheaters, not really blatant or anything, it's like expecting 20 cheaters in 2000hrs of gameplay(if you are lucky) normally less.

I would never run to a game, and be like "Play this with me, there's no cheaters or bots"

it's a never ending game of cat and mouse, sure they have a kernel level anti cheat, which gives it more control over your own computer than you do, but anyone saying theres no cheaters is not being accurate. I'd say there's less cheaters, you will almost never make a game where someone can't cheat on it.

I never said it doesn't have cheaters, I said it has way less cheaters compared to CS:GO and others, + the vid you posted contains virus lol, it's an old scheme to post malwares as free cheats, you won't find UD cheat for valo anywhere for free or paid unless it's DMA.

Uhm you said bots which I understood as not real players just like PUBG is filled with, where did I

said about cheaters?

I may be interested in playing Minecraft with you, but I'm not sure about Hypixel. I do have a server that I currently play on. I could ask the owner if you are able to join us or not :)

Yeah I'll play, I probably won't be an "active" player though.

OSRS you could at least join a clan whether with people from here or not so that as you play you have a chill group of people to talk to, ask questions to, etc.
