Thread: [PROCTOR BYPASS SOFTWARE ANY RAT START YOUR CERTIFICATION SERVICE TODAY LIMITED](#)

PMMR - June 18, 2024, 4:57 pm

@PMMR's Proctor Bypass - FROCTOR

This Proctor Bypass software is used to circumvent the methods employed by proctoring software to prevent you from sharing your screen remotely. The software is designed to work with any remote access tool (RAT) of your choice, making it an invaluable asset for anyone who wants to start their own certification service.

As a security measure, I will only be selling 4 copies of this software (One being reserved as a vouch copy for someone who has good rep in the forum). By limiting its availability, I can avoid the exploit being patched and ensure its effectiveness for a longer period. However, if you're interested in having just one copy exclusively for yourself at a higher price point, please don't hesitate to reach out via private message (Telegram: @ProphetMMR).

What's Included?

- Lifetime Access to the Bypass Software
- Thorough set-up guide
- Software Support via Telegram

In the example above I used Quasar as my RAT and bypassed PearsonVue using my software

Bypass is working for the following proctors: PearsonVue, ProctorU, Respondus, Proctorio, and more!

BIN: \$7k USD

Please, Only Serious Inquiries Only:
Telegram - @ProphetMMR

IF YOU ARE INTERESTED IN THE VOUCH COPY PLEASE PM ME ON HERE AND MAKE SURE YOU HAVE DECENT REP!
