This seems like a good service just glancing fast at it, anyone used it and can tell me about their experience? I feel like a good way to get more customers is maybe give a test sms at register and if u can't do that because of the abuse factor then add some verification in to it or lower the 50\$ for a first time deposit. Would like to test tho, really interested my last provider just bounced and I had like 400\$+. Anyway looks nice..
