Do you think it's better to just play slots to win bytes or mix it up with the other games? What's the best way to play for bytes?

I personally like NHL in sportsbook

Slots, sportsbook for me are great games. I like card games so blackjack is fun sometimes. Haven't really gotten into HUM because i feel the entry to win anything is to high.

I mean, house always has odds right? I'd say the best way is to do sports betting if you can find solid advice on that, or just like sports in general.

I wonder what the house edge on flip is? If its an even 50 then its the best by far. Other than that blackjack would be a close second I think
