If you are not into blackhat stuff, stay off this post respectfully

Basically, this is more like ewhoring, but not the old cashapp, venmo bullshit. If you're into blackhat stuffs and want to grind send a message. I need serious folks to grind and make \$\$\$. I am quite good at social engineering but poor at pulling traffic. This method works 100% but it is solely dependent on traffic from dating apps. So i need folks that are good at traffic, you bring the traffic, i se the targets and we both split profit.

Only serious folks should send a msg, not playing around also i don't need your money and i'm not here to selling no damn guide. Just need a group of hustlers to make \$\$ with crypto. I intentionally don't want to go into full details here since it's a public forum,
