Thread: [Favorite Summer Reads?](#)

Hey folks,

Summer's here, and for me, that means more time to dive into some good books. I'm looking for recommendations on what to read next. What are your favorite summer reads or what's currently on your reading list?

I'm starting with a mystery novel I've heard a lot about, but I'd love to hear your suggestions!

Who in their right mind dives into book during summer? Get out and do something...

Honestly not much of a book reader. Never really was I guess. I do enjoy reading various articles and things of that nature online though and about topics that interest me or I'm trying to learn more about.
