Thread: [\[WTB\] Logo & Branding](#)

Prawnster - June 27, 2024, 7:21 am

Hi guys,

Got a new business in the making and we are needing some branding done, just a light & dark themed logo to start with and then it'll progress into more designs like ad creatives etc if we are happy with your work!

Not looking to go huge with the budget for this since it's just a logo.

Drop me a PM with your portfolio and I'll get back to you with specifications if we like your portfolio!

Thanks.

I could use AI to make some like mock examples for a really rough sort of idea that I'm looking for? It's basically going to be clean and bright, we've got the theme of Bees like bumblebees so yellows/gold and black. :)

i mean , you can pick any type of logo in google or pinterest, not necessarily same theme as yours , as long as you liked the style / type.

Checked out a few, think my preference is sort of a minimalistic but eyecatching style.

Something in these sort of styles but incorporating the Bee theme :D

EDIT:

Also like this sort of style too tbh <https://i.imgur.com/80Ji6oo.png>
