Bought it.. Looking forward to it.

He has been really helpful in setting up and explaining how is everything. It is good for someone new and wants to learn. We are still working together and I hope to learn a lot of stuff from him.

Very trustworthy seller, I purchased his diamond package, and he built the entire panel I had requested all within a few hours. He has been absolutely supportive in every way including answering all my questions and providing me access into his private group. He has promised to continue with mentorship and guidance as long as I will need. Great guy has my vouch all day.

For anyone reading this dont use his telegram links. The group one appears to lead to a third party that attempts to deal you off site. If you try to deal off site you most likely will be scammed without much help. I took screenshots of everything incase OP doesnt agree.

It's a bit weird you appear as banned.

So people can outsource everything to you, apart from the spreading?
