I want to take it can you give it to me.. I will possibly loose out being not too reputable as of yet.

But I have been on forum since 2012. And I am right on the point where I am needing to spread so I will possibly be implementing it rightaway and share actual results. I am about to buy scrub crypter as well.

Thanks mate really appreciate this.
Will leave a review once its read.

Actually read through this very quickly and yes its something new that I haven't done or heard of and would it work, I'm pretty positive.

This is not your usual spread via torrents or game hacks.. Clever, I think you could do with something like this.

I'll do a full review when I get a chance to test it out, but reading the first paragraph was like.. shit yeah, why I didn't think of this.

So many possibilities with this one

Thanks for the vouch copy. My review on this:

Overview:

The method is extremely new which I have not read earlier here on hf.
It can be done almost without any starting capital , having some capital would definitely increase its efficiency.

Pros:

>> The method can be modified to get exactly the type of bots you want, as in you can target GEOs, even target what level of hardware you want if you are a bit smart about it. This is the major Pro I think of this method.

>> This can be well automated and become a really solid flow of bots once executed as detailed in the guide.

>> The guide is crisp and to the point without any fluff which I like.

Precaution :

>> File being FUD is a major requirement here so you must have some idea on how to regularly update the file to keep it FUD.

Although this would be a requirement in any spreading method.

I might be personally trying this method soon.

To clarify you probably need about \$30 to begin.

Hi, is there a vouch available ? Thanks

MrCarco - June 30, 2024, 5:24 am

what is it concretely? spreading or scrub?

LOL yes ofc this is needed and also some malware would be good.

Unless your spreading something else :D

Scrub is the seller and the method is a spreading guide.

I received a vouch copy of Scrubs private spreading method. After a read through, Scrubs explanation to my questions actually provided some insight I didn't think of.

The method is scalable for both new and advanced users, and does not require much, if any investment, but would likely do better with small investment in setup. There are also ways to change your targets, so I would say method is suitable for almost all campaigns. I also have no doubt that if you have an intended audience, he will help you tailor your results, but the setup as is would definitely get you desirable results.

The only requisite is that your file is fully undetected, however, that would be the same for ANY spreading campaign.

Good luck with sales!

Ok i bought i hope method work great :D i will write a honest review when i got results of it :D

Okay, Honest review by a Simple mortal buying stuff here

I readed several times the "guide" and in a simple way i recommend people to not buy anything with vouched copies because it doesnt reflect the real approach of "guides" selling here

First of all, the method seems intersting and maybe should work but its just as always involve ads like everything its just a variant like a malware redo, with tricky time.sleeps thats all

Second: The guide is waaaaay too expensive for 7 pages with poor text NO IMAGES
i suggest down the price to 20 usd with the Quality offered here

Third: No resources, it involve a website and any Copy of the site provided as a example so LOL

Suggestions: Put at least some images in this "guide" and also resources buddy
if you going to charge random people 250 USD at least make it more interactive (images, resources, examples copies) to to not feel so cheated.

Recommended? No at this Price
Satisfied with the product? Hell, no. ?

Exactly is the quality of the guide HAHA, 7 pages of just one vague idea of a spreading method with any type of results in any image, any type of recommendation, and any resource, so really its incredible that selling this for 250 usd

It's incredible that the mods allow this type of posts cheating people that they will get a decent spreading guide and not just 400 words of a vague idea without any results or any image

totally a scam

Wilmer - July 4, 2024, 10:02 pm

Don't know what we're spreading but I'm here to spread love and positivity. ? GLWS. Scrub is a reputable member if anyone on the fence about this.
