I remember Celeste having really good OST. Very chill and lo-fi-y.

I still remember the dynasty warriors 2 intro. I was not that old back then when i was playing it. Early teens i guess? Damn that hit hard.

Also twisted metal: black - especially the menu theme. really set the dark vibe.

The best video game OST is obviously The Legend of Zelda Ocarina of Time. It's... legendary I dare say.

Oh man, there are tons of great ones. Souls games, final fantasy games, elder scrolls games, and many others. So much great music done for video games.
