Thread: [Portforwarding of redline without using router](#)

testadura - July 5, 2024, 3:29 pm

Hello i have a problem who can help me how to do portforwarding without using router, and using redlinestealer cracked? pls let me know [warn]

DramaKing - July 5, 2024, 4:00 pm

Connect your PC directly to the modem. UPnP may be an option if the router supports it. There are or have been port-forwarding VPNs that will forward a port on a public IP address to you.

Also, you should read the [Help Docs](#) before you ask about cracked software for any reason.

RDP is a protocol, first of all. Second, your friend doesn't know what he's talking about. It's a server that receives logs. It works like any other server at a basic level. If the port is open, the implant will connect. You'd have to build the payload with your IP address or domain name, however.

Hello,

I saw your thread on REDLINE, I can help you,

Due to @HF rules I can't help you on your TL.

Contact me, or drop a handle where I can contact you.
