Thread: [Crypto AI Bags](#)

1stAlucard - July 8, 2024, 12:07 pm

Do you guys hold any crypto AI? I'm talking CGPT, PAAL, 0X0 etc.

I think AI has a big chance of blowing up if the bull run doesn't get cast to the shadow realm and looking for some more potential plays, lemme know what you hold, cheers!

badbart - July 8, 2024, 12:58 pm

I think CGPT is my first choice. Just need to find money to buy some that's my main problem. ?

Omniscient - July 8, 2024, 1:30 pm

Explain to me what "crypto AI" is.

Challenging you to think a bit about what you're investing in.

If you mean whether those projects really use AI or if they try to innovate anything then that's not my goal, I'm just looking for things that people will look for and catch their eyes so the chances of them pumping are higher, I know about Fetch.AI and a few others as legit "AI" projects but I'm only really looking for the memes of the AI crypto category if that makes sense lol

Decent choice based on the name, people might flock to it

Oh so you want shitcoins and you're telling others which shitcoins to buy. Nice way to be a cunt.
