History:

Once upon a time, in the vibrant world of the internet, a new player emerged to offer innovative hosting solutions: AlexHost.com. This company, founded in 2013, aimed to provide robust and reliable web hosting services to clients around the globe.

AlexHost.com began with a clear vision: to deliver high-quality, affordable hosting solutions backed by exceptional customer support. They set up their primary data center in the heart of Chisinau, Moldova, ensuring top-tier infrastructure and security measures. This strategic location allowed them to serve a diverse clientele with efficiency and reliability.

The company's data center was equipped with state-of-the-art technology, featuring redundant power supplies, advanced cooling systems, and high-speed connectivity. This setup guaranteed minimal downtime and maximum performance, a crucial aspect for businesses relying on their online presence.

Alexhost is worst service. They blocks connections to the accounts by VPN or Proxy then banned the account with prompting wrong credential and banned ip without any notice to the mail. I lost accesses to my 4 vpss at once. Don't use this service.
