Just your obligatory bull post.

What alts are you holding? Any memes? Shill me something.

I'll be seeing you guys in Valhalla real soon.

DrRespect - July 15, 2024, 5:17 pm

I'm holding some SOL, I believe it will reach \$1k.

Would like to see some other chains come up amidst congestion issues on SOL and ETH, namely looking at performant L1's.

This aged well.

ETH is coming up next ladies and gentlemen.

Also buy memes.

ETH \$10k would mean BTC \$200k. Keep dreaming about ETH. It's gonna have a lackluster season.

I swear Focus Broken hacked you or bought HF off you and is using your account to post BTC Maxi propaganda.

Or maybe Focus Broken made the best arguments and has so far turned out to be correct. The thing is I've lived a long enough time in this world to see some truths way before they are spoken as the truth by the majority.

Ethereum is very much in trouble as a long-term prospect in the market as the #2 market cap.

ETH has absolutely NOTHING going for it other than more L2s being deployed and native rollups still being worked on lol

SIM-5084040 - November 16, 2024, 11:07 am

Did you know that Ethereum Foundation sold 4,266 ETH

Omniscient - November 16, 2024, 3:03 pm

Past week ETH vs BTC... I can do longer charts too, basically same crap. ETH not going to move with BTC.

ETH:

BTC:

Meh, people gonna believe what they want. If you think ETH is great, good, put your money there. Good luck on that. I'll be sure to keep updating this thread.

For short term like 3 years from now I think Solana, Litecoin , Bitcoin Cash will grow but I am not a financial advisor and do your research

Skidsuper - November 21, 2024, 12:00 pm

I am only holding BTC because peace of mind is little more important at my age.

SIM-2501407 - November 21, 2024, 12:09 pm

Might break 100k today folks. BTC on a RUN.

I think it breaks it tomorrow.

Hopefully ETH takes off like the meme coins, but we shall see. I'll be sold out long before ETH is 10k personally, lol.

Regulus - November 21, 2024, 12:20 pm

Should I just swap all my ETH to BTC or something? Since that seems to be the best option for long-term holding right now.

Kinda wanna hold some ETH and LTC though.

thats my wallet

80% btc (hodl and stfu)

10% solana (rebalance every 1 month now)

5% sui (a "bet"?)

2% ltc (love this shit)

2% eth (no comment, nothing is happening right now and the eth/btc graph is bleeding hell but, you know, there's always the hype and new developments to come)

1% expensive memecoins (just for fun)

With this setup, I sleep very well at night.
