Thread: [INFINITE \\$8 LOOP \(EARN \\$100 IN 15 MINUTES\)](#)

This is a new method that has recently come out. It utilizes an app's referral system to make more accounts for yourself, get \$8 from each account, then cash out after a couple hundred \$\$ to avoid too much suspicion. Then you make a new master account to refer from. Their detection system isn't great, so unlike temu and other referral apps, you can largely get away with referring yourself. I recommend using another mobile device, and doing a full reset between each referral. Also use a VPN address for each account.

any vouches for this? also the links on the docs aren't working

cooldude535235 - August 22, 2024, 12:16 pm

Doesn't work, requires ID verification for EVERY account you purchase on or they just dont give the reward, and by ID i mean credit card statement/utility bill

It seems like an outdated method, they also say all fraudulent referral will not get paid.

spamhard450 - January 18, 2025, 4:28 pm

you think is possible to get that method

MarshalMathers - January 18, 2025, 4:31 pm

Usually they catch on fast about fraud on these types of sites. Isn't worth it imo.
