TapGOAT is a next tap game that allows you to farm \$GOAT tokens with minimal efforts. Through their Telegram app for FREE

They are backed by multiple big names and confirmed the listing on various Tier-1 Exchanges. Go to [CLICK HERE](#) (ref link) ? Open the link in Telegram and click on "Start"; ? Press "Play" and go through the splash screen.

Joining with my ref link gives us both extra 5000 tokens that potentially can be worth 100s of dollars, but not required.

how do the \$GOAT tokens turn into \$2000 a month? If they are giving them out for free like that they can't be worth much.
