Thread: [Telegram Spam Bot \(NEEDED\)](#)

EqualityINS - July 21, 2024, 9:55 pm

Hi guys , i'm searching for someone with a telegram automated bot to send messages in group with a specific timeframe on each message sent on multiple telegram accounts.

I'm planning on spamming in a lot of groups. So please only message me if you got experience.

I'm totally new to coding etc and how this works so if you could stand by me or help me sometimes when i get lost u would be appreciated :)

Just send me a message on telegram or pm me on here.

I got a few more things related to this like telegram scraper for groups but this has more priority.

The problem with bot, you can't add bot into group where you're not admin.
