Thread: [finding IP address](#)

DryRiver - July 22, 2024, 10:50 pm

what is the easiest way to find someone IP address and track it ?

any help ?

Hi,

I mean it entirely depends on how you intend to source said IP address and from what platform. You could use as mentioned above grabify. Or something like Wireshark depending on your target.

Give a brief outline of your target and ill be able to give a better explanation. Eg. someone on snapchat, or xbox, or discord, skype etc.

Please keep your replies HQ according to the [Help Docs](#).

Here's a whole list of ways if simply sending a Grabify link doesn't work.

<https://hackforums.net/showthread.php?tid=6270422> Are you trying to see the area where someone is located?

is it possible to know the id of a person on telegram or whatsapp? it is not in my contacts and uses

a fake profile picture

You wish. Like I mentioned above, you can see a general region, depending on how localized the IP address pool is. Try the Private Investigations and OpSec forum for doxing ideas that work.

Probably won't work on someone with a fake profile, but them's the breaks.
