Thread: [Golang RAT Modify](#)

__GS__ - July 23, 2024, 5:25 am

Hello,

I need an modification done on a web based rat.

The problem I am facing is that when I run the client/build.exe as 2 different users on same machine, it automatically closes the first client/build.exe on same machine.

Project Link:

<https://github.com/XZB-1248/Spark>

Paying good for this, PM me or add my discord.

EDIT:

If anyone looking for golang dev, contact this guy:

--

When everyone said it's impossible, He completed the job for me, Paid him 5x more than what my budget was.

\$500 to him. Kudos to him!

Most likely due to mutex, if it runs more then one process it kills the 2nd one.

if still required Let me know . Multiple process at the same time can be run by cloning process but anyways I need to see insight.

Project completed by me. I highly recommend working with Goldsound.

Very professional and nice to work with.

Thank you.

Thank you.

Thank you.

What a genius he is, hardworking. Recommended user to deal with.
