Thread: [I need ways to earn money with zero investment or low investment](#)

Melalis - July 24, 2024, 7:07 am

Hello friends, I am looking for a way or ways to earn some currency on a daily basis.

Please pay attention to the following.

1. I can't do real life business because of the need for a degree and also the ridiculous salary of 100 dollars per month.
2. I live in a country that has received thousands of international sanctions by the United Nations and its communication with the outside world is completely blocked, just like North Korea with the difference of being allowed to leave the country. Of course, in exchange for money as exit fees. (Welcome to the Middle East)
3. I am not interested in commission work such as dropshipping or selling products and such issues, and please note that even if I wanted to give money, it would be impossible due to the sanctions, unless I spent a few hundred dollars to do things like that or freelancing with a fake identity. the tenth
4. Preferably, I can convert the money into cryptocurrency or such online payment services are used: payeer, webmoney, prefect money, crypto currency

I don't think there is another issue that I have forgotten.. Finally, thank you for your time. You are saving a life.
