I have nostalgia for this game. If somebody has never done this, I would recommend you get baked, order a McChicken and a sprite, play your chilliest playlist and just free roam on skate 3. Trust me you won't regret it.

This is incredibly random, but also doesn't sound that bad either lmao.

I imagine you're pretty excited for Skate 4? I know tons of people were super excited to even just have it finally get announced haha.

I was excited when they announced it, but I'm chilling cause they're taking long to make it. I'm sure it'll be fantastic though.

Yeah that's fair of course. Seems like it could realistically come out by the end of next year. If not than I figure it's gotta be first, maybe second quarter of 2026. Idk off the top of my head how long it's been in development for, but yeah I do believe based on what I've seen that 2025 is possible. Time will tell and I'm sure it will be a banger.
