Thread: [How to Cash out my Amazon.com Giftcard balance?](#)

**JNath** - July 30, 2024, 10:40 pm

I have around \$215 in my Amazon.com account and i don't live in USA and i don't wanna buy anything from there because shipping and import fees costs more than the product itself.

Amazon doesn't let you buy giftcard of any kind from giftcard balance now so buying apple or sephora cards is not the way, i have this balance since 6 months and it's legit in all ways. I want to know how can i cash it out for btc or paypal like if i could buy some stuff for something at 70-75% of the actual price?

Use this site: <https://www.ipayyou.io> or <https://bitoff.io/earn>

You basically buy them Merchandise using your Amazon Balance and you earn digital currency/crypto.

Many people may know this site. It's just like the earlier purse.io

Also read this:

<https://medium.com/@asdeww22/top-10-alternatives-to-purse-io-after-purse-shutdown-b202d3262490>

they are worth trying rather than sit on Amazon balance.

I made this thread a long while back. I'm fairly certain buying best buy giftcards still works.

If your not in the US, it'll probably flag your account though.

You could find products on Amazon.com that you could dropship on another platform. I normally wouldn't recommend dropshipping, but in your case, you could try it.

Which other platform will be good if you can suggest?
