Thread: [Need an Outdated .NET Framework](#)

junkyfeet900 - August 2, 2024, 3:03 pm

Hello hackforums.net . I am Searching for the Microsoft .NET Framework 3.1.0 . It has Reached EOS . If Possible, I would Appreciate some Guidance for Installing the Framework on Linux Mint 21.2 .

<https://github.com/dotnet/core/blob/main/release-notes/3.1/3.1.0/3.1.0-install-instructions.md>

The instructions are already there, just read it. Hope it helped. You also need to install snap package manager in your Linux Mint 21.2.

Are you referring to .net core or actual .net 3.0 which is from circa 2008?
