Thread: [I want to code a GitHub for hackers with ChatGPT :-\)](#)

The Watcher - August 3, 2024, 3:19 pm

Any advice for Me?

I'm pretty good at coding now, since Chat GPT codes for Me.

But I'm still learning. I need tips on how to rip the website github.com and use it's template. My AI won't do it properly, probably.

:-)

I want to create a GitHub for ONLY HACKING/FRAUD/ILLEGAL SHIT!

I want it to feel like GitHub, but be more green. Advice?

Aurelius - August 3, 2024, 4:45 pm

a guide on how to go to jail

A guide on how to survive prison is somewhat interesting to a lot of people. Curiosity is one hell of a thing.

<https://about.gitea.com/>

It might be what you're looking for.

padrino - August 3, 2024, 5:44 pm

Yeah... you'll get yourself arrested. Don't do that.

Please don't compare yourself to coders.

Coders can turn off AI and write code.

You're a prompter. Turn off AI and what will you do?

Just ask GPT what to do.

None of your questions require answers, you have AI. Something tells me the whole LLM writing code thing isn't actually the same as knowing how to code.

I only say this because I hope it helps. Don't let yourself be tricked into confidence because an LLM can spit out code.

Just clone the site,
Replace all the API routes, database, etc
Put it up on a server
Market it

Let us know if you need any help, you picked a huge project to take on. Any specific questions ?

Yadayadayada, I know I can code better and faster than most coders. Let's evolve!

Nice, please explain your plan for the diff check, ort vs others for merge strategies, and your plan to deal with basic features like git actions, pull requests, and forks.

As technical as possible please.

Oh, that won't take long to implement, maybe 10 minutes.

If you need assistance with coding, ask Chat GPT. :-)

yeah so you just wanna build an unsecure version of github full of ai comments?

please dont rely on chatgpt THAT much.

learn basic webdev, also i feel like theres no reason for this.. theres already a shit ton of malware source code on github, and theres already sites made for malware code snippets..

(Aug 3, 2024 04:45 PM)BlackThoughts Wrote: [\[CITE\]](#) a guide on how to go to jail for a failed github clone? ?

jeannyetal - August 10, 2024, 7:35 am

Fork Git and make the hub?

Looks like you got stuck on the forking part. thats a shame

for a failed github clone? ?

No, not on my GitHub, and I doubt on the real one either. (My internet is changed by the government)

But yees, continue to mock yourself.

Mercury - August 10, 2024, 9:07 pm

Something like this would only "work" on the darkweb, and even then...would you really want to be responsible for that?
