Thread: [I need some ideas on how to add graphics to my game in python](#)

minecraftuser101 - August 4, 2024, 11:03 am

I am making a game in python but I have no idea how to be able to add graphics to my game, anyone know how?

webdev77 - August 4, 2024, 11:14 am

What have you tried so far? I don't think you've even done a web search yet or asked a GPT how to do this?

You're going to need to be a little more specific. "Some pip stuff" is basically anything python related what so ever.

I just asked ChatGPT to write me a python GUI and it did no problem.

I am using the official python installer does that make a difference

The pip install thing says it wants me to use the pip install pygame command

No.

Quote:The pip install thing says it wants me to use the pip install pygame command

PIP is "Package Installer for Python". It installs packages. If you want to install the pygame package, it would be "pip install pygame" to do so.

You put it in your console. Depends on your OS but for windows put it in cmd, for MacOS/Linux put it in your terminal.

You know you can also ask these basic questions to chatgpt since it seems you're already relying on it for your entire development.

Are you using pygame?

minecraftuser101 - August 6, 2024, 7:01 am

(Aug 5, 2024 04:45 PM)Klonopin Wrote: [\[CITE\]](#) Are you using pygame?

Yes it is wanting me to use pip install pygame
