Thread: [Download Kali Linux in terminal](#)

Iseenoev1l - August 9, 2024, 6:58 pm

How do you download Kali Linux in terminal? I get a lot of package errors using default terminal/linux and want more functionality

Download the OS in a terminal? Is there a reason? This doesn't sound like what you're trying to do given the mentioned errors, but this is how you literally download Kali Linux in the terminal or at least the AMD64 ISO.

Code `wget https://cdimage.kali.org/kali-2024.2/kali-linux-2024.2-installer-amd64.iso`

webdev77 - August 9, 2024, 7:14 pm

You can just use curl to download files.

Code `curl -O yourfilename.iso`

`https://cdimage.kali.org/kali-2024.2/kali-linux-2024.2-installer-amd64.iso`

That's it.

Put in actual effort if you want further free help. You didn't say that and act like it's our problem. It's your problem.

Not acting like its your problem. I'm new to this so after doing further research and putting effort! I noticed Chromebooks operate differently so to answer your question I said I have Chromebook to offer further info

That's a little unfair. He should have known that it mattered, but call it an oversight.

If you want to install a different OS, don't use a Chromebook. I can tell you that a Chromebook doesn't boot an OS like a PC. To install Kali Nethunter, it will have to be a Samsung Chromebook or Chromebook 2.
