Thread: [Share your motivational goals, wish list purchases](#)

PappyProxy - August 12, 2024, 7:37 pm

I am earning money part time changing to full time and maybe a salary change in the near future. I am having trouble thinking where I would like to use my spending power. Please share recent purchases or nice wish list purchases or even larger goals.

Wish list : way too much anime crap to post

Bastille - August 12, 2024, 11:50 pm

There are lot of things I would like to buy :

- more books about computing, hacking, cybersecurity
- few mini computers (such as minisforum ones) to develop another homelab
- a mini rack for this homelab (like 19" and 10 or 15U)
- furnitures for my apartment
- tattoos

Motivational : improving my skills in the IT / hacking / cybersecurity, and regarding my apartment I bought it 1 year ago and it's still empty AF lol, I need a bed, a couch, a wardrobe, a TV, I don't even have a fridge and an oven

I don't have a wish list, but I recently purchased a gaming laptop for video editing, and a Samsung G5 to compliment it. Other then that, all other recent purchases have just been essentials.

Not related to tech but I'm striving to reach an ELO rating of 2000 in Chess. My long-term goal is to become internationally titled one day. Don't really have a wishlist though.

Nothing too special but general wish list would be;

- Land a Pentesting / Red team job
- some tech stuff like a Framework laptop, mini computers, wireless pentesting tools
- build a home lab
- buy a house / land

I wish you the best of luck with earning. The main thing on my wish list of sorts or that is essentially the next big ticket item I'd like to purchase is definitely a new PC.

I would like to lose some weight, get my own apartment and become gainfully employed. I don't have any wish list purchases really, just small shit like an air fryer or something of the like.
