Thread: [Private & Public Crypts Exe & APK files| Sign EV | Bypass Smart screen | Crypto Only](#)

Loaded Lux - August 13, 2024, 3:56 pm

Welcome to our crypting service! Here, we offer expert encryption of your payloads to ensure they remain undetected. I can crypt your native file and .Net file .We provide a variety of packages tailored to meet different needs and budgets, so you can choose the option that best fits your requirements. Whether you need basic protection or advanced crypting solutions, we're here to help keep your data secure.

Package:

Public Stub - \$50

Private Stub - \$200 APK file crypt - \$100

Crypting + EV signin - \$750 (a year warranty)

Payment : Crypto Only

Runtime and Scantime result:

With our EV certificate, it will be used for three customers, registered under an organization. To avoid raising suspicion, we plan to assign three customers to one signing and reuse the same payload repeatedly while we re-crypt

Loaded Lux - August 17, 2024, 5:27 am

You can order for your crypt now all stub are currently FUD and last long.

RUNTIME & SCAN TIME: <https://avcheck.net/id/g66LMiBy9vRe>

Loaded Lux - August 25, 2024, 8:06 am

All orders have completed and stub is FUD.

Scantime and Runtime:

Tay_Roc - August 27, 2024, 5:29 am

I would like to sign my payload with an EV signature. Additionally, I have sent you a contract along with 3,000 bots. Please review and respond to me promptly.

esmaili - September 21, 2024, 3:36 am

the links you sent are only for scantime it is not possible to see also in runtime

I will upload runtime soon again :)

Robertbates009 - October 6, 2024, 3:58 am

Waiting to see runtime

Robertbates009 - October 7, 2024, 8:48 am

Still no update on runtime?

Loaded Lux - October 8, 2024, 5:03 am

Here is the new scac

Robertbates009 - October 8, 2024, 6:20 am

Still scantime. We are looking forward to runtime mate

Want to purchase the \$750 package but need to be sure. You advertise 1 yr warranty. So warranty covers crypting and ev cert? If after sometime ev cert stops working, you will replace at no additional cost? Same applies to crypting?

This is the result for my stub, and I'll update it once I subscribe to Kleenscan. The EV certificate is valid for an entire year, while the crypting service lasts as long as the file remains undetectable. If the EV certificate encounters any issues before the warranty expires, it will be replaced at no additional cost. However, if the file gets detected, you'll need to pay for re-crypting the payload.

xjnhzaj12b2 - April 18, 2025, 1:49 pm

who has used his service, and is ev signature still effective ?
