Thread: [Esimbuy.org Discover Travel eSIM data packages](#)

esimbuy.org - August 21, 2024, 1:42 am

Our Website Word Cheap Prices We Offers !

Step 1

Browse our catalogue of eSIMs covering over 150 countries.

Step 2

Make payment. We accept all major credit cards, Cryptocurrency

Step 3

You will receive a QR code to activate your eSIM within 2-3 minutes after making payment. Please ensure you check your junk/spam box.

How can I use the eSIM service?

iOS: You must have iOS 12.1 or later and an unlocked iPhone. Any iPhone older than XR or XS supports eSIM. (Note: When you buy a device with a contract from a mobile operator, it is common practice for them to lock the connectivity from any other supplier. In this case, your device will be considered "locked," at least until your contract expires. You can check with your operator to see if there is anything you can do to unlock the eSIM in your device.) Samsung, Pixel, and many Androids support eSIM.

In what scenarios can eSIM service be used?

Here are a few of the many ways you can use eSIM:

Add a local data plan when you travel outside of the country or region.

Use eSIM for Data and keep your voice line separate.

How to Set up eSIM for iOS?

Purchase the eSIM data plan on our website.

Receive the eSIM QR code by email.

Set up your eSIM profile as follows:

Go to your device [Settings] > [Cellular or Mobile Data] > [Add Cellular Plan].

Scan the QR code provided by email.

Tap [Add Cellular Plan].

Choose [Secondary] Label and change the name to "eSIM."

Select the option for "Use eSIM for cellular data only" and tap [Continue].

Select the option for 'Use Primary as the preferred line' and tap [Done].

Check if the APN Name matches with the eSIM order: Tap on eSIM > [Cellular Data Network] > [APN].

How to Set up eSIM for Android?

Purchase the eSIM data plan on our website.

Receive the eSIM QR code by email.

Set up your eSIM profile as follows:

Go to your device [Settings] > [Network & Internet] > [Mobile Network].

Tap "Download a SIM instead?" > Download your SIM > Tap [Next].

Scan the QR code provided by email.

Tap [Download] and [Done].

Check if the APN Name matches with the eSIM order: Tap "eSIM" and tap [Advanced] > Tap [Access Point Names] > [APN].

How fast is the network speed?

4G/LTE service is available in most countries and continues to be covered in more countries.

Are voice calls and SMS included?

Only data service is available.

How to use dual SIM on iPhone and set up your cellular plan with eSIM?

Dual SIM on iPhone offers you the freedom to get separate voice/SMS and data plans. At this stage, only cellular data is available on our eSIM platform. Therefore, after you scan a QR code to add the eSIM, please label it "Secondary" on the "Cellular Plan Labels" page, and then go to the "Default Line" page, choose "Use [Secondary] for cellular data only." You will see a little pop-up "Uncertified Cellular Plan," just click "OK." For more questions about Dual SIM, please check the official document on Apple's website: Apple Dual SIM Support.

Should I switch on Data Roaming when using eSIM?

Yes, please make sure that Data Roaming is on. Please go to "Settings" > "Cellular" and turn on "Data Roaming." Please also remember to turn it off after use.

How to remove the eSIM data plan after use?

You can use your phone's delete eSIM function.

How do I get my eSIM after payment?

You will receive an email with your QR code. Please check spam if you have not received it after 1 minute.

How is the validity period of the plan calculated?

The actual usage time of some data plans may start according to your eSIM's first connection. We will describe this in the package information.

How to check the balance of remaining data?

For some packages, you can view the data usage in the order, and for some orders, you cannot view the data usage. You might go to [Settings - Cellular] on your iPhone to find out how much cellular data you're using.

Can I have multiple phones scan the same QR code?

No, but the same device can rescan the same QR code.

If I lost my eSIM QR code, what can I do?

Check your email or contact us.

Will my physical SIM still work while eSIM is installed?

Yes, your physical SIM can still work. We suggest turning off data roaming and turning on "WiFi calling."

Buy Now !

Esimbuy.org: Transforming Global Connectivity with eSIM Technology

In today's highly mobile world, seamless connectivity is no longer a luxury but a necessity, particularly for business professionals, digital nomads, and frequent travelers. esimbuy.org is at the forefront of this connectivity revolution, offering an innovative platform for eSIM technology, which is reshaping the way we stay connected globally.

What Sets esimbuy.org Apart?

Global Coverage: esimbuy.org provides coverage in over 200 countries, ensuring that users can maintain their mobile connectivity wherever they are. Whether for personal or business use, this extensive reach eliminates the need to switch between local SIM cards.

Instant Activation: No more waiting for physical SIM cards or dealing with complicated setup processes. esimbuy.org allows users to instantly activate their eSIM via a simple QR code scan, making it easy and hassle-free.

Flexible and Affordable Plans: esimbuy.org offers a wide range of data plans that cater to various needs, whether for short trips or long-term global use. These plans are designed to be flexible and affordable, giving users more control over their connectivity without breaking the bank.

Sustainability: By eliminating the need for physical SIM cards, esimbuy.org contributes to a more eco-friendly mobile solution, reducing waste and supporting sustainability goals.

Cutting-Edge Technology: With support for 5G networks where available, esimbuy.org ensures high-speed, reliable mobile data access, keeping users connected even in the most demanding environments.

The Future of Mobile Connectivity

As global mobility increases, the demand for flexible and efficient mobile solutions continues to grow. esimbuy.org stands at the intersection of technology and convenience, offering a future-proof solution that meets the needs of today's travelers and professionals. By leveraging eSIM technology, esimbuy.org is not only making connectivity easier but also more sustainable, efficient, and accessible to everyone.

Whether you're traveling for work, leisure, or running a global enterprise, esimbuy.org ensures you remain connected wherever your journey takes you.

Make the switch to esimbuy.org today, and experience the future of mobile connectivity.

? Discover esimbuy.org: Empowering Global Citizens with Uninterrupted, Sustainable, and Secure Connectivity Solutions

In an era defined by digital transformation and global mobility, staying connected across borders is no longer a luxury; it's an essential part of personal and professional success. Whether you're a business professional, digital nomad, or an avid traveler, maintaining a strong and reliable connection has become fundamental. esimbuy.org is dedicated to providing advanced eSIM solutions, delivering seamless connectivity without the constraints of traditional SIM cards, and redefining how we experience the digital world.

Why esimbuy.org is the Go-To Choice for Modern Connectivity Needs

At esimbuy.org, we recognize that our clients require more than just a connection – they need a flexible, reliable, and sustainable solution that adapts to their global lifestyles and supports their digital demands. Our platform offers access to a broad array of eSIM options, tailored to meet the diverse needs of customers across various regions, from Europe to Asia to the Americas.

What Sets esimbuy.org Apart

? Expansive Global Coverage

Enjoy the convenience of switching seamlessly across networks in different countries without ever changing a physical SIM card. esimbuy.org offers a vast selection of eSIMs compatible with networks in multiple regions, including major markets like the USA, Japan, the UK, and more. Our global coverage ensures you stay connected, no matter where your journey takes you, making it ideal for those who travel frequently or manage cross-border business.

? Transparent, Affordable Pricing

We're committed to providing high-quality connectivity solutions at competitive rates, with complete pricing transparency. Say goodbye to surprise charges and roaming fees. esimbuy.org offers flexible pay-as-you-go plans and customizable options, so you only pay for the data you need. This affordability and adaptability make our solutions accessible for both occasional and long-term users.

? Instant, User-Friendly Activation

Gone are the days of waiting in line or dealing with complicated installations. At esimbuy.org, setting up your eSIM is effortless and can be done within minutes. With just a few clicks, you'll be connected to a secure network, backed by our dedicated customer support team that's available 24/7. We're here to ensure that you experience a smooth, hassle-free setup, wherever you are.

? Sustainability and Environmental Responsibility

Our commitment to the environment is part of our core mission. By providing digital eSIMs, we reduce the need for plastic SIM cards, supporting a more sustainable, eco-friendly approach to technology. esimbuy.org believes in aligning with green tech practices, offering a connectivity solution that's both modern and mindful of its impact on the planet.

? Enhanced Security and Data Privacy

In today's interconnected world, security is paramount. Our eSIMs are designed with advanced encryption and data protection protocols, providing a secure network wherever you connect. With esimbuy.org, you can trust that your connection is protected, offering peace of mind for professionals, travelers, and companies who prioritize data security and privacy.

? Experience the Future of Connectivity with esimbuy.org

With esimbuy.org, you gain a partner in connectivity that evolves with you. We are committed to supporting your digital lifestyle and helping you stay connected, whether you're navigating business meetings across continents or sharing travel moments with loved ones back home. esimbuy.org is more than just an eSIM provider; we're your trusted ally in achieving borderless, hassle-free, and eco-conscious connectivity.

Visit us at and take your first step towards embracing a new era of digital freedom and connectivity.
